Brainstorming and Idea Prioritisation

Date	29-09-2026
Team ID	SWTID-2026-1971
Project Title	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

1.Brainstorming Template

No.	Problem / Need	Brainstormed Idea	Expected Benefit
1	Manual creation of laptop configuration tasks	Automatically create Catalog Tasks using Flow Designer	Reduces manual work
2	Delay in laptop configuration	Automatically assign tasks to Hardware team	Faster configuration
3	Tasks may be assigned incorrectly	Set Hardware as the default Assignment Group	Better task allocation
4	Approval may be missed or delayed	Trigger the workflow after approval	Prevents unnecessary processing
5	Users have to wait for configuration	Start configuration tasks immediately after approval	Reduces user waiting time
6	Manual entry can cause errors	Automatically populate short description and	Reduces data-entry errors

		description	
7	Multiple process automations can cause confusion	Use one dedicated Flow for Standard Laptop requests	Simplifies the workflow
8	Difficulty tracking request progress	Use Service Catalog and Requested Item records	Improves visibility
9	IT resources may not be efficiently used	Automate task assignment to the appropriate team	Improves resource utilisation
10	Procurement process is time-consuming	Create an end-to-end automated workflow	Improves overall efficiency

2. Idea Prioritisation Template

No.	Idea	Impact	Feasibility	Effort	Priority
1	Automatic Catalog Task creation	High	High	Low	High
2	Automatic assignment to Hardware team	High	High	Low	High
3	Trigger workflow after approval	High	High	Low	High
4	Automatic description/short description	Medium	High	Low	High
5	Standard Laptop dedicated Flow	High	High	Medium	High
6	Request status tracking	Medium	High	Medium	Medium
7	Automated resource allocation	High	Medium	Medium	Medium

8	Reduce manual data entry	High	High	Low	High
9	End-to-end procurement automation	High	Medium	High	Medium
10	Improve user experience	High	Medium	Medium	Medium

3. Final Prioritised Ideas

High Priority

- Automatic Catalog Task creation
- Automatic assignment to Hardware team
- Approval-based workflow triggering
- Automatic task description
- Reduction of manual data entry
- Dedicated Standard Laptop Flow

Medium Priority

- Request status tracking
- Resource allocation optimisation
- End-to-end procurement automation
- Improving user experience

4. Simple Prioritisation Matrix

	High Feasibility	Low Feasibility
High Impact	Automatic task creation Hardware assignment Approval trigger Automatic descriptions	End-to-end automation
Low Impact	Status tracking Reduce manual entry	Additional optimisation
