Demonstration Phase

Date	26-09-2026
Team ID	SWTID-2026-1971
Project Title	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

1. Open ServiceNow

- Open the ServiceNow platform.
- Navigate to **Flow Designer** under Process Automation.

2. Demonstrate the Automated Flow

- Open the flow named **Standard Laptop Task**.
- Show the **Service Catalog** trigger.
- Show the **Create Catalog Task** action.
- Demonstrate that the task is configured with:
    - Short Description: **Laptop need to Configured**
    - Description: **Laptop need to Configured**
    - Assignment Group: **Hardware**
    - Approval: **Approved**

3. Demonstrate the Service Catalog

- Open **Service Catalog**.
- Navigate to **Hardware → Standard Laptop**.
- Select **Order Now** to place a laptop request.

4. Demonstrate Approval

- Open the created request.
- Navigate to the **Approvers** section.
- Approve the request.

5. Demonstrate Automatic Task Creation

- Open the **Requested Item** record.
- Navigate to the **Catalog Tasks** section.
- Open the created task.
- Show the updated status, short description, and **Hardware** assignment group.

6. Demonstration Outcome

Standard Laptop Request → Approval → Automatic Catalog Task Creation → Hardware Group Assignment → Laptop Configuration

7.Conclusion

The project successfully automates the **Standard Laptop procurement process** using ServiceNow Flow Designer. The workflow automatically creates and assigns a Catalog Task to the Hardware team after approval, reducing manual work and delays. This helps ensure timely laptop configuration, improves resource utilization, and provides a smoother user experience.
