User Acceptance

Date	29-09-2026
Team ID	SWTID-2026-1971
Project Title	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

User Acceptance Criteria

No.	Acceptance Criteria	Expected Result
1	User can access the **Standard Laptop** service from the Service Catalog.	Standard Laptop option is available.
2	User can place a laptop request using **Order Now**.	Request is successfully created.
3	The request can be sent for approval.	Approver can review and approve the request.
4	After approval, a Catalog Task is automatically created.	Task is created without manual intervention.
5	The Catalog Task contains the required laptop configuration details.	Short description and description are updated correctly.
6	The task is automatically assigned to the **Hardware** group.	Hardware team receives the task.
7	User can view the request and task status.	Updated status is visible in ServiceNow.
8	Hardware team can process the configuration task.	Laptop configuration can be completed promptly.

User Acceptance Outcome

The solution is accepted when a **Standard Laptop** request can be submitted, approved, automatically converted into a Catalog Task, assigned to the **Hardware** group, and tracked through its status with minimal manual intervention. This supports the project's goal of reducing user waiting time and improving the procurement process.
